NARRATIVE QUESTIONS

1. **Please explain any significant change in the number of applications received during the reporting period.**

   There have not been any significant changes to the number of applications received this past year.

2. **The average length of time to process an application for claim eligibility for compensation**

   Count days from time of receipt of application to decision. 7

   Please explain your state's procedure for processing an application for claim eligibility, from time of receipt of application to decision. Wyoming's procedure for processing CVC claims begins when our office receives the (paper) application. The application is date stamped and the received date is entered into the CCVC database utilized by our state. The date the claim is received is referred to as the "new date." The claim is then presented to the Claims Analyst who will review the claim for completeness and, if the claim is complete and able to be processed, the Analyst will make a decision on the eligibility of the claim. The date that eligibility is determined is referred to as the "resolution date" and a corresponding "resolution code" is entered to reflect the status of the claim (ie: Approved; Denied; or Unable to Process). If a claim is "unable to process" the claim will undergo follow up to see if there is missing information that must be obtain before the claim can be resolved as approved or denied. The Resolution date of a claim previously identified as "unable to process" will be changed to reflect the date the claim was finally resolved as "approved" or "denied." The calculation of "processing time" measures the time between when the claim is received (New Date) and when a decision has been made on the claim (Resolution Date). The actual calculation for this reporting period was 6.6 days.

3. **Does your state have a victim satisfaction survey?**

   No

4. **Please describe any emerging/major issues or notable trends that were encountered in your state that had an impact on your program's ability to meet the needs of crime victims during the reporting period.**

   There are no notable trends to report on. Wyoming is the least populated state in the nation, so comparatively, our numbers are low by comparison to other states, but our percentages track with other state programs. As a profoundly rural state, Wyoming victims are often required to travel a great distance in order to receive services. CVC assists by reimbursing victim's mileage and per diem in the event they are required to travel (often out of state) to receive the needed assistance/ services as a result of their victimization.

5. **Please describe in detail efforts taken to serve Victims of Federal Crime during the reporting period.**

   Wyoming routinely works with our US Attorney's Office Victim Assistant Coordinator as well as our local FBI, DHS, and BIA victim service program managers. With both a Air Force Base and a large land mass Indian Reservation in our state, compensation routinely receives claims from tribal members and victims of crimes that fall under federal jurisdiction. All of our programs across our state are versed in assisting crime victims for both state and federal crimes.

6. **Please describe any notable activities during the reporting period that improved the process of victim compensation services.**

   This past reporting period Wyoming CVC has made a concerted effort to train all 62 funded victim service providers on mass casualty protocol. Beginning in May 2018, CVC worked with Rita Gatlin, FBI victim specialist, on responding to mass casualty events at the Division of Victim Service's Mandatory Meeting. Further, as follow up, Lesley Osen, Sr. Compensation Analyst for Wyoming's CVC, had done program based training across the state for mass casualty response.

7. **Please describe in detail ways in which your state used VOCA Administrative funds and the impact of these funds on the state's ability to improve victim compensation services during the reporting period.**

   As described above, our Compensation Analyst will conduct training to programs as requested, and when that training involves travel, administrative funds are used to support that travel cost. Additionally, Wyoming uses administrative funds to ensure both the SAA (Division Director) and the Compensation Analyst attend national and regional compensation training conducted by NACVCB. Finally, administrative funds are used primarily to support the ongoing maintenance for our Compensation Claims Database administered by Genoa Group.

8. **Were there any laws, initiatives, or policy changes in your state regarding victim compensation during the reporting period? If yes, please briefly describe them and their impact.**

   There were no legislative changes during this reporting period. However, CVC implemented a policy change and increased the amount of money available for Funeral/Burial from $5000.00 to $7500.00 based on information obtained in a study by the Council of State Governments as part of our state's justice reinvestment initiative. I anticipate some legislative reform to emerge from the aforementioned Justice Reinvestment Initiative, however this will be accomplished during our state's General Legislative Session beginning January 2019.

9. **Please describe system-coordination efforts with prosecutors, law enforcement, courts, U.S. attorneys' offices, tribal systems, State VOCA Victim Assistance Coordinator, or other key personnel within the criminal justice system in your state to reduce barriers to victims who may apply to receive victim compensation.**

Each year our office conducts a Mandatory Meeting for all of our sub-recipient programs. At this meeting programs are apprised of any innovations in victim services or changes within our office that would affect service delivery to victims. A component of that meeting programs are given compensation training and guidance. Additionally, with the use of VOCA-Assistance administrative funds, our office holds an annual conference where all allied professionals are given extensive training on best practices for victims. Again,as part of the curriculum at the conference, there is an emphasis upon and updates to crime victims compensation. Finally, every Peace Office Basic candidate in our state receives victim's compensation training delivered to them as part of their core curriculum at the Wyoming Law Enforcement Academy. The Academy training is given my the Director of the Division of Victim Services (SAA for VOCA Comp.)

10. **Please explain any public outreach efforts to improve awareness of your program.**

As described above, we rely on our sub-recipients, whom we train, to conduct public outreach to victims on the availability of crime victims compensation. I do not believe we have any issues in our state with victims understanding the availability of crime victims compensation. By making sure all advocates, law enforcement and other allied professionals are both aware of and trained upon the crime victims compensation program, Wyoming makes great strides in improving public awareness of the program. The Division also has a Facebook page and Website hosted by the State of Wyoming where information and FAQs on Crime Victim Compensation are readily available.

11. **Please list any other outcome measure(s) that are reported to the governor, legislature, or other state entity that have not been reported in this submission. Provide the actual measure(s). The data may be reported separately in your progress report.**

PMT is the primary data source for outcome measure specifically on compensation. However, the Division of Victim Services does use the data we collect from all of our programs via all of our federal grants to compile a "state of the state" each year for our Governor. We track where our compensation applications come from, and thus can measure which programs are serving what victims.

12. **Please provide any additional comments that are helpful to improving the Victim Compensation state and/or federal program.**

I am very supportive of any change in how the Compensation Formula money is calculated. Specifically a recalculation of how state funds are deducted/ and/or the percentage that is re-allocated (IE: $0.60 / state dollar could be raised to $0.74/ state dollar). Further, as an agency that administers both VOCA-Compensation & VOCA- Assistance, I would like to see Assistance money used to support more compensation activities.
