# Adoption/Implementation Plan: Vermont Victim Assistance Academy

## I. Adoption Plan

| <b>Performance Objectives</b> | <b>Influential Factors</b>       | Strategies                 |
|-------------------------------|----------------------------------|----------------------------|
| For staff:                    | Personal:                        | Tailor<br>program to       |
| Evaluate victim               | Knowledge,                       | staff needs.               |
| assistance                    | awareness.                       |                            |
| educational needs             |                                  | Contact                    |
| in their job.                 | Outcome                          | person                     |
|                               | expectations.                    | recruits                   |
| Know VVAA                     | •                                | registrants.               |
| exists as a response          | Identification of                | -                          |
| to need.                      | contact person who attends VVAA. | Distribution of            |
| Review VVAA                   | who attends VVAA.                | applications, brochures.   |
| characteristics               | Identification of                |                            |
| (favorably).                  | program champion.                | Presentations at meetings. |
| Learn how to apply            |                                  |                            |
| to VVAA.                      |                                  |                            |

### II. Adoption Decision by Advisory Group Members (Staff Buy-In)

| Performance Objectives | Influential Factors | Strategies              |
|------------------------|---------------------|-------------------------|
| For agencies/programs: | Personal:           | Regional presentations. |
| Decide to adopt.       | Outcome             | _                       |
|                        | expectations.       | Discussion.             |
| Identify program       |                     |                         |
| champion.              | Attitudes (positive | Problem                 |
|                        | evaluation of       | analysis.               |
| For program champion:  | program             |                         |
|                        | characteristics).   | Social support.         |
| Facilitate adoption.   |                     |                         |
|                        | Skill set to get    | Meeting to              |
| Meet with in-house     | personnel buy-in.   | plan                    |
| partners to assist     |                     | implementation.         |
| adoption.              | External:           |                         |
|                        |                     | Problem                 |
|                        | Existence of        | solving.                |
|                        | supports.           |                         |
|                        |                     | Newsletters.            |

Orientation meetings.

Time and workflow decisionmaking.

#### III. Implementation of New Practices, Heightened Awareness After VVAA Attendance

| Performance Objectives                            | <b>Influential Factors</b>   | Strategies             |
|---|------------------------------|------------------------|
| Plan to orient new or untrained members.          | External:                    | Regional coordination. |
|   | Time and workflow.           |                        |
| Talk about serving                                |                              | Technical and          |
| victims/survivors using skills learned from VVAA. | Documentation.               | social support.        |
|   | Program champion.            | Social                 |
| Document program shifts.                          |                              | reinforcement.         |
|   | Staff buy-in.                |                        |
|   | In almost the second         | Role modeling.         |
|   | Implementation of practices. | Newsletters.           |
|   |                              | Resources.             |
|   |                              | Information.           |

#### IV. Institutionalization

| <b>Performance Objectives</b>              | <b>Influential Factors</b>                         | Strategies             |
|--|--|------------------------|
| For Advisory Group members:                | Personal:  | Regional coordination. |
|  | Behavioral capability                              |                        |
| Integrate VVAA practices                   | and skills to integrate                            | Technical and          |
| into routines.                             | new practices into routines.                       | social support.        |
| Use VVAA in                                |  | Social                 |
| orientation of new staff.                  | Outcome expectations.                              | reinforcement.         |
| Write new practices into job descriptions. | Social reinforcement.                              | Role modeling.         |
| mo joe descriptions.                       | External:  | Resources.             |
| Write continuous                           |  |                        |
| quality improvement plans.                 | Routine discussion of practices in other meetings. | Information.           |
|  | Documentation.                                     |                        |
